

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

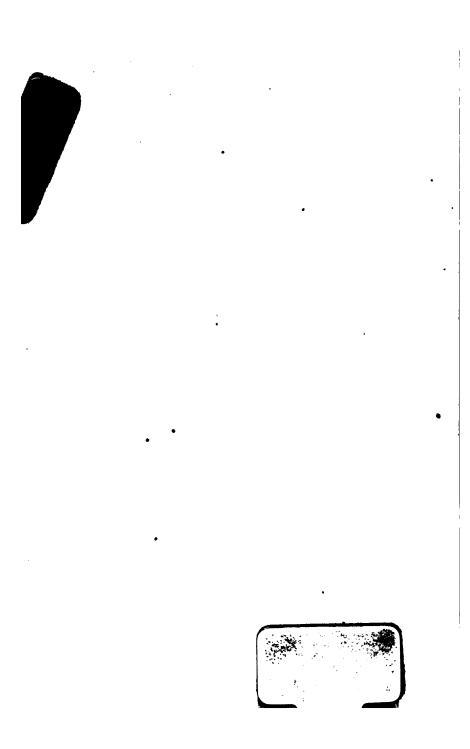

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

THE

TIMBER MERCHANT'S

AND

BUILDER'S COMPANION,

CONTAINING

New and Copious TABLES of the REDUCED WEIGHT and MEASUREMENT of DEALS and BATTENS, of all sizes, from One to a Thousand pieces, and the relative price that each size bears per Lineal Foot to any given price per Petersburg Standard Hundred.

ALSO,

A variety of other valuable information, useful to all parties concerned or interested in the buying or selling of Foreign Timber.

BY

WILLIAM DOWSING, timber merchant, hull.

LONDON:

SIMPKIN, MARSHALL, & Co., STATIONERS'-HALL COURT.

HULL:

JAMES PLAXTON, 51, LOWGATE.

1858.

ı

INTRODUCTION.

From my earliest connection with the Timber Trade, it has been to me a matter of surprise that no Book similar to the one I have now published has previously made its appearance for the benefit of that large and important class of society who rank as Contractors, Builders, Carpenters, Joiners, Cabinet Makers, Wheelwrights, &c., &c., and which would also be of equal value to every one identified with the Business of a Timber and Raff Merchant and Vendors of Wood Goods in general; to each of those Branches of Trade this Book will be found exceedingly useful, giving a copious mass of valuable information on various matters requisite for every one connected with either the Buying or Selling of any description of Foreign Timber to possess (a species of information which is at present confined, and that only in part, to a very limited number of those who are associated with the Wholesale Timber Business).

I have given in Table No. 2 a comprehensive scale of the reduced weight of all widths, lengths, and thicknesses of Deals and Battens, from one to a thousand pieces, or a Ready Reckoner, whereby any person, though totally unacquainted with the method of Reducing Deals to the Standard Hundred, can ascertain at one glance the precise weight or reduced measurement of any quantity or size of such Deals and Battens above mentioned, being not only a ready mode of checking or ascertaining the precise measurement or the correct reducing of any invoiced goods on the part of the Buyer, but it will be equally valuable as a check or an assistant to the Vendor of the said Goods.

Useful as this table will be to all parties concerned or interested in the Timber Trade, there are other tables of equal importance, particularly Table No. 3, wherein I have shewn what the exact price per standard will be of all sizes of Deals and Battens, at any given figure per lineal foot, from one farthing to ninepence. To every purchaser of Wood Goods such a table will prove to be invaluable, as it shews at a glance what the cost per foot will be of Deals and Battens of various dimensions, from 1 to 4 inches in thickness, and from 6 to 21 inches in breadth, when the value of those goods is rated at any given price per standard; the table at the same time gives the number of lineal feet, &c., contained in one standard hundred.

In Table No. 4 I have shewn what the price of square timber will be per load of 50 feet, at so much per cubic foot, varying in price from 1/2 to 4/3.

The Book contains other useful information, which cannot fail to be appreciated by every importer, retailer and consumer of foreign timber, the whole of which I have compiled in different tables, headed by explanatory remarks, enabling all classes of readers fully to understand the true meaning of the information given.

It has cost me a considerable amount of labour in compiling this Book for the Press, but if in its circulation it should, as I anticipate it will, prove to be of considerable use to that class for whom it is expressly intended, I shall have the satisfaction of knowing that my labour has not been in vain, and shall feel amply rewarded for my trouble.

WILLIAM DOWSING.

HULL.

TABLE No. 1 Contains a TARIFF or the Present Rate of DUTIES on various descriptions of WOOD GOODS, imported into Great Britain from the Baltic and the British North American Ports.

LIST OF DUTIES PAYABLE

ON THE

IMPORTATION INTO GREAT BRITAIN OF

TABLE No. 2.

In this Table the REDUCED WEIGHT or Petersburg Standard Measurement, is calculated and given of all sizes of DEALS and BATTENS, from 1 to 1,000. For Example—60 Deals, 21 feet long, 8 inches thick, and 11 inches wide, is precisely 1c. 3q. 0odd., as shown in the table; thus at one glance it can easily be ascertained what is the precise weight or measurement of any quantity, size, or description of Foreign Deals, &c.

21 Feet 3 by 11 inch Deals Reduced.

N.B.—When the freight of Deals and Battens by water or rail is charged by the ton, in order to ascertain the precise tonnage of any quantity of any size, add for every standard $2\frac{1}{2}$ tons' weight. For example: 60 deals, 12ft. long, 3 by 11in., being exactly one standard, would be charged as freight, 2 tons 10 cwt.

....

•

.

TABLE No. 3,

Gives the exact price per Petersburg Standard Hundred of all widths and thicknesses of Boards, Deals, and Battens, at any given figure per lineal foot, varying from a farthing to ninepence. For example: To ascertain what the cost per standard will be of 3 by 11in. Deals, when the price per foot is 3½d., look on the parallel line in the table opposite 3½d. in the margin, until you come under this particular size of 3 by 11in., as shown above, and you will perceive the value per standard hundred of deals, that size at 3½d. is £9 15s., and by the same mode the price per standard of every other size is given, at any given figure per lineal foot.

TABLE No. 4

Gives the price per cubic foot of square timber, at any given figure per load of 50 feet. For example: If a log of timber is worth 1s. 3d. per cubic foot, the cost per load at the same ratio will be £3 2s. 6d. In this table is shown what proportion the price of timber by the load bears to the price per cubic foot, from 1s. to 4s. 3d.

TABLE No. 6.

In this table is shown the relative value that each 120 12ft. deals and battens, of various sizes, bears to any given price per Petersburg Standard, from £7 10s. to £18, with the number of cubic feet in each 120 12ft., and the proportionate value of a load of timber and deals, of 50 cubic feet, to any given price per Standard. For example: 120 12ft. 3 by 9in. deals, at £7 10s. per Petersburg Standard, will cost £12 5s. 6d., or at the rate of £2 5s. 6d. per load of 50 cubic feet of Timber; 120 12ft. Deals, 3 by 9in., contains precisely 270 cubic feet, as shown in the margin of the table, and so on with every other size given.

TABLE No. 7.

In this Table is given the price of Scantling of any size per running foot, at any given price per cube, from 2s. 6d. to 4s. 6d. For example: To ascertain the price per running foot of a piece of scantling 6 by 4, at 2s. 6d. per cube, multiply the square at the end 6 by 4, which would be 24 inches; then look at the line parallel with 24 inches in the margin and under the cube price of 2s. 6d. is 5d., which is exactly the price per foot of the scantling alluded to 6 by 4.

PRICE OF SCANTLING BY THE BUNNING FOOT.

TABLE No. 8.

In this Table is shown the proportionate value of Timber by the load of 50 feet cube, to 3 by 11 inch Deals, at any given price per Petersburg Standard Hundred, from £6 to £27; also the relative value of Timber by the cube foot, to 3 by 11 inch Deals per lineal foot from 2d. to 9d. For example: If 3 by 11 inch Deals cost 3d. per foot, that is at the rate of £9 per Standard, the proportionate value of Square Timber at that rate would be £2 14s. 6d. per load of 50 feet, or 1s. 1d. per foot cube.

Proportionate value of 3 by 11 inch Deals per Standard, to Timber by the Load of 50 Feet Cube.
